Hello,

Saint Dennis Catholic Church recently purchased the Chime Master Six-SS. The Chime Master unit replaced a 1988 Schulmerich Carillon Quadrabell II-D.

Working with regional sales representative Thomas L'Heureux, the model Six-SS was selected. Tom had brought the Six-SS to Saint Dennis for a helpful hands-on demonstration.

Tom was instrumental in helping design the program schedule, as well as explaining the benefits of the following accessories: QSC 70-volt amplifier, wireless remote control, and antenna extender for the remote control.

It was easy for me to install, by following the provided illustrations-rich directions.

I especially like the fact that the Six-SS automatically powers ON and OFF the amplifier, saving on energy costs and wear and tear.

The remote control comes in handy during funerals and Masses that would not be part of the regular program schedule.

The Six-SS has been working flawlessly through daylight savings time changes and church season changes.

I am very happy with our purchase. In our case, the Chime Master Six-SS quietly and dependably works in the background.
