Chime Master Systems
P. O. Box 936
Lancaster, OH 43130

Dear Chime Master:

A little over a year and a half ago, a parishioner contacted me, and expressed interest in donating a "chime system" to the Basilica. Although we already had three bells which struck the hour, he liked the idea of also having the ability to play chime hymns on a regular basis from the steeples, and was willing to pay for a system which would do this.

I made a quick decision to go with another bell company with which I was familiar. However we asked your company and others to make presentations of their systems anyway, just out of curiosity. I then had to change my quick decision! We found the Chime Master System to be much preferable to any other in compact design, number of musical selections, ease of installation, cost, wide variety of features, and especially chime tonal quality.

The Chime Master System was installed ten months ago, and I am still very pleased with it for the above reasons. The parishioners are also delighted with the system, as are non-parishioners who live nearby.

I have already recommended the Chime Master System to other pastors who have contacted me, and would be happy to recommend it to any church or institution that wanted a good chime system, with many options.

Yours sincerely,

A handwritten signature in black ink, appearing to read "Rev. Edward C. Petty".
