April 24th 2015
Jeff Crook, Chime Master

Mr. Crook,

We at Carson's Chapel are very proud of our Chimes. This little country church which is at the bottom of the Appalachian Mountains and surrounded by farm land and dairy cows and chicken farms are waking up to the sound of beautiful chimes and they love it. In regards to the animals we witness the cows marching toward the sound of the chimes. The church was able to accomplish this blessing by a benefactor and her friend to have the chimes placed in this community. The donors were regionally from Germany and she called the chimes bells and they were placed in every church or cathedral in all of Germany and she experienced this while growing up. She wanted her church to experience this beautiful sound also.

The donor wants to bring people into our church and she respond to let the community know this beautiful church wants to invite all people to come to her church. She wanted to use the chimes as an evangelism tool in search of bringing people to Christ and the church is the place to worship and find peace, love, forgiveness, mercy, and grace.

In finding your company to bring these beautiful chimes to our church. I search the internet and God led me to call and receive information from your company Mr. Crook he was so helpful and I explained we had a particular budget to meet and he sent me all the paper work to present to the church. Mr. Crook you connected me to the representative Mr. Bryon Hames and he was very helpful. These chimes will always be remembered by two people that loved their church. This Sunday we will dedicated the chimes and present the plate to the congregation. The plate will be in memory of her friend and in honor of the benefactor.

Thanks again for all your help.
