Selections for Special Occasions

Most of the following selections will not play randomly, but are useful for special occasions. They may be programmed to play automatically if they are removed from the program after the special day (you will have a week to do this). They also can be played in the manual mode.

For morning hymns, choose a different tune to play first, each day of the week. It may be followed by one or more random selections. The same arrangement could be used to program an evening hymn following the evening prayer bell or curfew time.

About the Disc Libraries and Bell Voicing

All discs are encoded with denominational, seasonal and style data that allows the system to correctly select appropriate random music, regardless of how the discs are loaded in the magazine. Two bell voicings are available for Chime Master Digital Compact Disc Carillons. Selections numbered in the 1000s are performed on Concert Chime with Harp Bells. Selections numbered in the 2000s are performed on a Cast Bell Carillon.

The Enhanced Operating System Disc, catalog CMS1111, contains most of the liturgical and time striking bells. It also contains software coding required for enhanced operation of the system. This disc is typically loaded into tray one of the disc magazine(s). The disc in tray 1 must contain time striking bells (see Specialized Ringing Functions on a previous page).

Disc CMS1111 also contains a number of musical selections performed on Concert Chime with Harp Bells. You may install Cast Bell Carillon library discs with CMS1111 and lock out the Concert Chime selections. The system setup procedure described in the first few pages of the operating manual describe a method of locking out one or the other bell voices. To lock out the music on disc CMS1111, lock out the 1000s selections by entering a [1] in the setup procedure when asked which library to lock. Note that if no Cast Bell Carillon discs are installed, no music will play randomly.

In this catalog, the first digit of a selection indicates the bell voicing and the second digit indicates the disc volume

number within the bell voicing series.
