

Platinum Advanced eXperience by Chime Master

The finest and most complete virtual bell instrument available.

The Platinum AX™ features a color touch screen presenting intuitive customizable menus. Initial setup screens clearly guide you with questions about your traditions, ringing preferences and schedule needs. Quickly access any feature you need with quick function buttons that you can customize with easily recognizable icons and colors. Create new buttons for special occasions. Set up your system and ringing schedules with simple screens. Organize your home menu with only the features you need.

The Platinum AX™ features our completely remastered high definition bell instrumentation. Choose your bell voice from twenty-three meticulously sampled authentic bell instruments including several chimes and carillons cast by European and historic American foundries.

Control your bells remotely from anywhere with Chime Master's exclusive Chime Center.™ Simply tap the front touchscreen Remote button to view a QR code that you can scan with your smartphone. Doing so instantly installs the remote control app and authenticates your phone with your bell system. You can use this remote app to ring your bells with the same quick function buttons you set on your touchscreen. The Chime Center™ portal seamlessly integrates online management and remote control. Facilitate schedule changes, backup of recordings and settings, as well as automatic updates as soon as they are available!

An expansive library of selections includes thousands of hymns in various arrangements and multiple customizable ringing functions. You may expand your collection by personally recording or importing thousands more.

Powerful front facing speakers provide inside ringing and practice sound when you play or record the bells using a connected keyboard. Combined with a Chime Master inSpire outdoor audio system with full-range speakers, the reproduction of authentic cast bronze bells is often mistaken for a tower of real bells.
